DOOR PREFINISHING OPTIONS

Better Durability Right from Day One

Prefinished doors have factory-applied paint that's baked on under controlled conditions. It means stronger adhesion compared with jobsite painting, better resistance to weather, and fewer issues with peeling, blistering, or cracking over time. Professional finishes are often tougher than field-applied paint considering unpredictable weather conditions on jobsites. Prefinish "slab only" or "slab & frame". Choose from 3 stock colors...White, Dark Grey or Black.

White

Grey

Black

- Consistent High Quality Finish - 3 stock colors available or we can match it to your custom color
- Prefinishing is available for "slabs" or "slabs & frames"
- Time and Labor Savings compared to Onsite Finishing
- Better Protection during Construction
- Better UV and Moisture Protection from the Start
- Higher Perceived Value and Curb Appeal

CUSTOM COLORS AVAILABLE

For an additional charge we offer custom color matching (which requires additional production time for your door)
